AMENDMENTS TO THE CLAIMS

Please add the following new claims:

37. (New) A cable disc brake for a bicycle comprising:
a caliper housing with a cable support having an opening for guiding a cable therethrough;
a first friction member coupled to the caliper housing for movement between a release
position and a braking position;
a second friction member coupled to the caliper housing and arranged substantially parallel
to the first friction member to form a rotor receiving slot therebetween; and
an actuated mechanism movably coupled to the caliper housing to move the first friction
member in an axial direction from the release position towards the second friction member to the
braking position;
